

Online Learning Platform Sales Analysis

Project Overview

This project analyzes purchase data from an online learning platform using MySQL. The database contains information about learners, courses, and purchases across multiple course categories such as Artificial Intelligence, Cloud Technology, Business Intelligence, ERP, and Automation. The objective of the analysis was to understand learner purchasing behavior, identify high-performing course categories, and evaluate overall sales trends.

₹87,599.97

Total Revenue

9 units · May 2026

Automation

Top Category

₹37,500 · 43% of revenue

David Smith

Highest Spender

₹37,500 · 3 × RPA course

Key Insights from the Analysis

1. Automation is the Revenue Leader

David Smith's 3-seat purchase of Robotic Process Automation (₹12,500/unit) alone contributed ₹37,500 — 43% of total platform revenue. No other category comes close in single-transaction value.

2. Cloud Technology ranks second

Bills Gates purchased 2 units of Google Cloud Fundamentals at ₹9,999.99 each (₹19,999.98). Cloud is the second-highest revenue driver and has strong multi-unit appeal.

3. No learner bought from multiple categories

All 5 learners purchased from exactly one category each. This indicates a lack of cross-category discovery — a key opportunity for bundling and recommendation features.

4. One course has zero purchases

SAP FICO Training (Course 106, ₹4,999.99) has not been purchased at all. Despite being competitively priced, it appears to lack visibility or learner awareness.

Category	Revenue (₹)	Learners
Automation	37,500.00	1
Cloud Tech.	19,999.98	1
Database	17,000.00	1
AI	7,599.99	1
Bus. Intel.	5,500.00	1

Learner	Course Purchased	Spent (₹)
David Smith	RPA	37,500
Bills Gates	Cloud Fund.	19,999.98
Alexandru C.	Data Wareh.	17,000.00
Timothy W.	Deep Learn.	7,599.99
Arun Kumar	Power BI	5,500.00

🔍 Course Performance Snapshot

#	Course Name	Category	Unit Price (₹)	Qty Sold	Revenue (₹)
1	Robotic Process Automation	Automation	12,500.00	3	37,500.00
2	Google Cloud Fundamentals	Cloud Technology	9,999.99	2	19,999.98
3	Data Warehousing Concepts	Database	8,500.00	2	17,000.00
4	Deep Learning Fundamentals	Artificial Intell.	7,599.99	1	7,599.99
5	Power BI Dashboard Design	Business Intelligence	5,500.00	1	5,500.00
–	SAP FICO Training	ERP	4,999.99	0	0.00 ⚠️

🔍 Strategic Recommendations

R1

Promote High-Margin Courses

Robotic Process Automation (₹12,500) drives 43% of revenue from a single learner. Bundle RPA with SAP FICO to increase per-order value.

R2

Target Single-Category Buyers

All 5 learners bought from only one category. Personalised cross-category emails (e.g., Cloud → Database) can significantly boost lifetime value.

R3

Activate the Unpurchased Course

SAP FICO Training (course 106) has zero purchases. Feature it with a limited-time discount or free preview to convert browsing learners.

R4

Grow International Reach

Learners span India, USA, Germany, Switzerland & Romania. Offer region-specific pricing (PPP tiers) to reduce checkout friction for high-price courses.

R5

Upsell Mid-Tier to Premium

Business Intelligence (₹5,500) is the lowest-priced purchased course. Create a BI → Data Warehousing learning path to naturally upsell learners.

R6

Incentivise Multi-Unit Purchases

David Smith bought 3 units of RPA (₹37,500). A volume-discount programme (5%+ off 2+ seats) can encourage team purchases from corporate buyers.

Methodology Note

Analysis based on 5 purchase transactions across 5 learners and 6 courses (May 2026). Revenue = Quantity × Unit Price. Queries used INNER JOIN, LEFT JOIN, RIGHT JOIN, GROUP BY, HAVING COUNT(DISTINCT), and LEFT JOIN ... WHERE IS NULL patterns in MySQL on the Learning_Platform database.

💡 Conclusions

The SQL-based analysis provided valuable insights into learner behavior, sales trends, and course performance. These findings can help the management team make data-driven decisions to improve marketing strategies, optimize course offerings, and increase overall platform profitability.
